

# Introducing IntegralFX for Payments

Re-imagining cross-border payments with over 25 years' technology experience in financial markets

Our SaaS technology enables you to take control of FX rates in your cross-border payment workflow.

## Take control

Our cloud-based technology, previously exclusively available for banks and brokers, allows you to actively manage exchange rates.

## Set rates by customer

Offer your customers "guaranteed" rates, real-time rates or anything in-between. Our pricing engine allows you to set rates at customer level.

## Get true currency market pricing

We pull pricing from multiple sources in the institutional market and aggregate it so you always have access to the best currency pricing.

## Take the cost out of currencies

Our FX capabilities allow you to manage currencies more flexibly, reduce risk and increase your profitability — it's a no brainer!

## Focus on keeping customers happy

Spend your time on keeping your customers happy while we take the complexity out of currencies for you.
